JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The general health of Barbados continues good, and even though the hot season is well advanced there is no increase in the general sickness. The mosquitoes have materially increased during the past month and many of the *Stegomyia fasciata* and of the *Culex fatigans* may be found. There are no diseases of a quarantinable nature now present on this island.

Report from Castries, St. Lucia Island—Transactions of Service—Mortality.

Passed Assistant Surgeon Fricks reports, July 1, as follows:

Week ended July 1, 1905:

Number of bills of health issued: Supplemental 5, original 1.

Number of vessels fumigated, none.

The sanitary condition of the port continues good.

There were during the month of June 44 deaths, none of them due to a quarantinable disease.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

AUSTRALIA—*New South Wales—New Castle.*—Month of May, 1905. Estimated population, 50,600. Total number of deaths, 51, including diphtheria 1, plague 2, and 5 from tuberculosis.
